

SUCCESS FOR STUDENTS...

And teachers alike.

Mr. Bennett uses the Time Timer®, an innovative visual timer, to make life easier in the classroom.

John began using a Time Timer® in his Montessori classroom early in his teaching career. He was helping students discover the world of inventions and inventors when Jan Rogers, inventor of the first Time Timer visual timer, came to share her story with the class. After the visit, John's students were excited to put her invention to work at school. They immediately saw the value it brought as they began to time each subject and share the responsibility for transitioning to the next activity. This allowed everyone in the classroom stay on track and thrive (including John).

The Time Timer visual timer wasn't just for work. John would often take a Time Timer visual timer outside for recess so the students in his class could fully enjoy every minute of time to play. John credits Time Timer® products for empowering his students to enjoy their time learning and playing every day.

“This was a way for them not to have to lean into me as the adult in the room... The Time Timer became another part of their environment that they could use to help foster their independence... and really give them a sense of pride when they were able to get their work finished.”

Anita, Educator

Every Time Timer® product is designed to make life for students and teachers alike easier and less stressed. Whether you're teaching or learning in the classroom, in the home, or at the library, we recommend the **Time Timer MOD® + Dry Erase Board** for ultimate time-to-task management.

Convenient caddy to hold markers and supplies on back. Pictured with Dreamsicle Orange.

MOD + Dry Erase Board
